EXPERIENCE

CVS / Aetna, (Remote)
Mid/Senior Level Full Stack Developer, SQL/C# | March 2025 - July 2025

- Optimized complex SQL queries to enhance performance for high-volume consumer outreach campaigns
- Developed and modified C# components to streamline backend data operations, improving developer experience
- Created a secure role-based access schema for internal servers, ensuring compliance with data governance standards

Huntington National Bank, Minneapolis MN
.NET Developer | September 2023 – January 2025

- Architected and designed components for fully refreshed consent application to fulfill updated regulatory requirements
- C# and .NET backend, React and TypeScript frontend with Material UI and internal "Honeycomb" component library
- Supported team as the go-to resource for frontend development
- Resolved accessibility issues using modern ADA standards

Allianz Life, Minneapolis MN
Software Engineer | July 2022 – January 2023

- Developed code in C# and React, managed microservice deployments with Azure DevOps, assisted agile sprint planning
- Developed React micro-frontend patterns and custom UX library with HTML+CSS, to be used as the basis of a full site redesign
- Revised and developed new process documentation and technical problem-solving on our shared platform Confluence

BuildingStart, Inc., Minneapolis MN
Software Engineer | November 2019 – July 2022
(Contract through Aerotek) | April 2019 – October 2019

- Full stack software engineer on team of two web developers; served many roles in a small company
- C# .NET data layer, SQL backend, TypeScript+HTML+CSS frontend with modified Kendo UI from Telerik
- UI/UX specialist on established web app redesign, used client feedback, refactoring menus, toolbars, navbars, data validation, and other modules and systems architecture
- Contributed to documentation with wiki articles and how-to's
